Memo to File:

Re: Utelite Product

On December 12th 1977, Mr. Fred Mortensen came into the office and talked with Brian, Jim and Mike about the filing for this operation. Mr. Mortensen asked many questions about his plan and it was quite apparent that he intended to complete the plan at Brian's desk. Brian told Mr. Mortensen that it would not be possible to adequately complete the plan in that manner and gave him until January 15, 1978 to submit a completed plan.
